The University of Georgia

College of Public Health
Department of Health Promotion and Behavior

February 12, 2008

The faculty of Health Promotion and Behavior approved a second track in the health promotion undergraduate major in October, and the two tracks were approved by the College of Public Health and the University of Georgia curriculum committees in the fall of 2007. The bulletin now reflects that students may choose between the tracks in consultation with an advisor. The second track was proposed to better serve pre-physician assistant students, as well as other students intending to work in health care or allied health care such as pre-medical, pre-physical therapy, and pre-nursing students.

We have been advised, however, that the area of emphasis that will be indicated on students' transcripts is relatively meaningless as currently named—track one and track two. We, the faculty to Health Promotion and Behavior, therefore request the tracks be renamed. The first area of emphasis, currently track one, will be Health Promotion, and the second area of emphasis, currently track two, will be Health Services.

Sincerely,

Katie Darby Hein, Ph.D.

The Health Promotion area of emphasis (currently track one) prepares students for health promotion and wellness positions in public, community, worksite, and health care settings, as well as for graduate level work in public health.

The Health Services area of emphasis (currently track two) in health promotion prepares students for graduate level work with an emphasis on disease prevention and wellness. Examples might include pre-physician's assistant, pre-physical therapy, pre-medical or pre-dental, or pre-nursing.
